Bonzai is an award-winning, stress-free intranet platform for SharePoint and Office 365. A suite of rich, flexible and powerful pre-built features, Bonzai is your modern digital workplace solution.

Communicate & Engage

Engage employees to seamlessly inform, connect and communicate with the most robust communications tools.

Internal Communications

Keep everyone in the know and drive conversations. Communicate, engage and share with your team with built-in *targeted communications, promoted content, news, sliders, event requisition, videos and more.*

Operations and Procedures

Build policy pages and custom *e-forms* effortlessly with *dynamic content* targeted at specific user groups. Easily setup, categorize, and manage your corporate policies for Finance, HR, Procurement, etc.
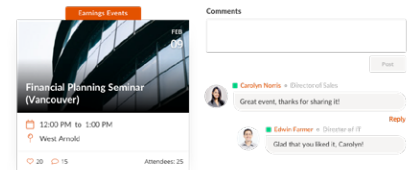

Employee Engagement

Engage employees with personalized experiences and social features throughout your website to infuse your culture and build community with *Marketplace, Events, Feedback, Surveys and more.*

News Publishing

Publish news to keep your employees informed while also engaging through sharing *workplace stories, spotlighting employee achievements, company achievements and more.*

Social Workplace

Engage and build community with social networking tools. *Post comments, like, share feedback and get live feeds* via integration with 3rd party social platforms.

Connect Employees

Provide employees a network to connect through pre-built with features like *People Hub, Employee Profiles, People Search and more.*

Search & Find

Control your search experience with powerful search and filter capabilities to efficiently find content and enhance the overall search experience.

People Search

Search and filter people by role, location, department and other relevant search criteria to find who you need when you need them with *Predictive, Type-ahead Search* to guide you.

Document Search

Find what you need with the Smart Document Portal coupled with *Advanced Search Capabilities*, including tagging important documents, favoriting documents and previewing documents before opening.

Content Search

Search the whole intranet with *Advanced Search Filters, Predictive Type-ahead Search and Item Previews*. Powerful SharePoint and Office 365 search integration to find what you're looking for quickly.
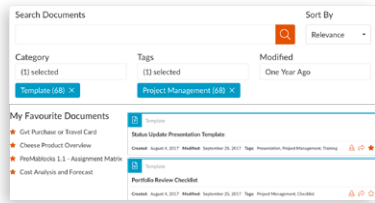

Collaborate & Empower

Build a centralized location to collaborate on all projects, documents and initiatives to break down silos and deliver task-critical information to your employees.

📁 Document Management

Access, download, and edit documents on the fly with powerful offline capabilities. Connect your team from anywhere, anytime with access to intranet documents from any device.
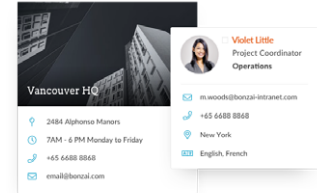

🔔 Forms and Workflows

Build and configure online forms and business rules to reduce manual work, automate your business and drive action with configurable and intuitive *forms and workflows*.

📍 Directories

Find who, what and where you are looking for while aligning and organizing your organization with *People Hub, Location Directory and Site Directory*.
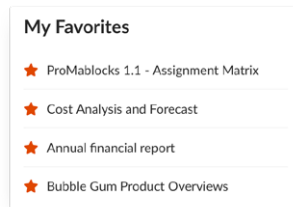

Personalize & Design

Create an engaging, relevant and personalized experience for each employee with powerful intranet design, personalization and branding capabilities.

⭐ Personalization

Personalize your intranet to make it your own through *tagging Documents, Sites and Apps as favorites to set targeted content and receive notification alerts*.
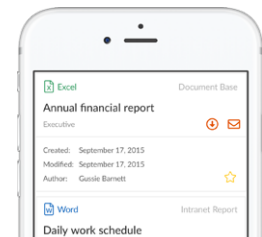

🖌 Branding

Design an engaging intranet through branding and updating color themes, adding logos and customizing styling to align with your corporate identity.

📱 Responsive Design

Give your team an intranet platform they can take with them wherever they roam, with anywhere, anytime intranet access, including powerful offline capabilities.

Build & Manage

Manage your intranet through an intuitive interface without technical or platform expertise, especially with the latest addition of Brick Provisioner for Bonzai.

📊 Intranet Analytics

Monitor and optimize your content consumption and user engagement levels. Collect, report and visualize data all in one place with modern and powerful intranet statistics.

🗂 Intranet Templates

Create *sites* and *pages* to target content to different teams in no time. Build engaging intranet sites and pages with ready-made templates and fully customizable layouts few clicks.

🤖 Brick Provisioner

No more manual configuration. Sit back and let Brick build you a new Bonzai through self-provisioning technologies and simple administrative tools.

Yammer · SharePoint Online · Office Delve · Microsoft Teams · Power BI
OneDrive · Skype for Business · Google Analytics · Exchange Online · Office 365 | Video

Deploy Bonzai your own way - Online, Hosted & On-Premises.

SharePoint Online · Office 365 · SharePoint On-Premises
